# Pallet Transporter

For transportation of steel scrap, slab, ladle, hot and cold coil, large prefabricated sections in shipyard and engineering machinery.

# Pallet Transporter

The Carr hydraulic pallet transporter can be  
widely used in steel plant, shipyard and other  
in-plant transportation for carrying steel scrap,  
slab, ladle, hot and cold coil, engineering  
machinery and large prefabricated sections in  
shipyard .

# Features

- 3D Design and FEA software are introduced as the computer assistance and optimization platform. To ensure an A-class design quality, “Virtual Testing Simulation” technology is employed in the structure design to realize the “Totally Visualized” design and analysis.
- Equipped with Bidirectional driving system and remote control system. Synchronous elevation and cooperating steering are provided by electro-hydraulic proportional valve and angle sensor.
- With the combination of mechanical link and electrical control.
- Hydrostatic drive system, auto-gear.
- Hydraulic suspension keep the vehicle balanced all the time.

# PT110

## PT110

**Dimensions**  
(Length×Width×Height)

~13000×4200×3215 mm

**Rated Payload**

110000 kg

**Net Weight**

~29000 kg

**Engine Power**

200kW

**Speed**

25 km/h

**Load Speed**

6 km/h

**Min Turning Radius**

12 m

# PT180

# PT180

**Dimensions**  
(Length×Width×Height)

~14750×4650×3600 mm

**Rated Payload**

180000kg

**Net Weight**

~40000kg

**Engine Power**

230kW

**Speed**

18 km/h

**Load Speed**

5km/h

**Min Turning Radius**

12 m

# Molten steel and iron transport

# Scrap bucket transport

Scrap bucket carrier is a flexible and efficient transporting vehicle for scattered materials. With its wide applications, this carrier can transport materials in power plant, port, metallurgical plant, mining and chemical industry to realize continuous operation for transfer, load and unload of coal, ore and steel scrap etc.

# Transport of square billet and flat blank

## Transport of square billet and flat blank

The transporter of square billet and flat blank is a flexible and efficient loading & unloading equipment which can be applied in port, iron and steel plant and mining, providing continuous operation for transfer, load & unload of square billet and flat blank.

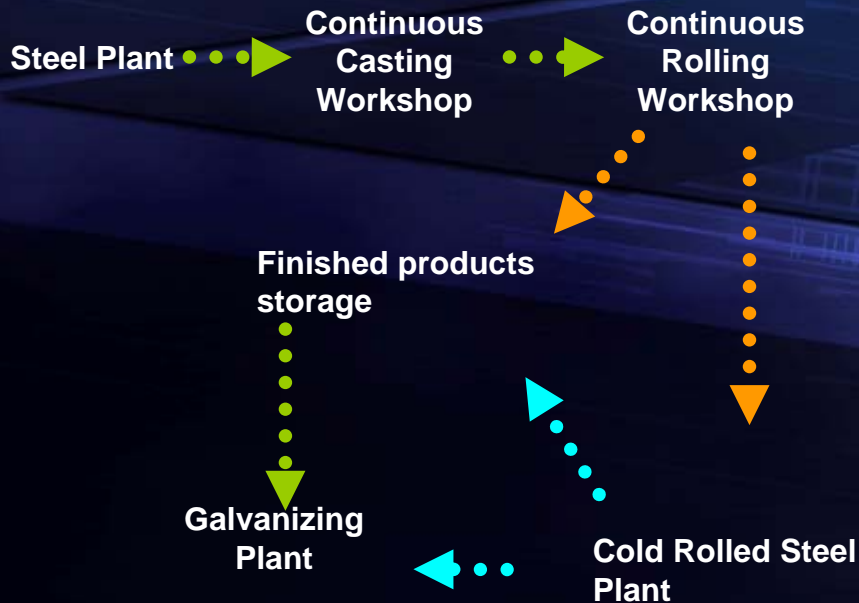

# Slab transporter

## Transport of slab

Slab transporter is applied in port and iron & steel metallurgy as a loading & unloading Vehicle, providing continuous operation of transport, load and unload for slab.

# Shipyards transport

# Engineering machinery transport

## Transport of engineering machinery

As a heavy-loading and efficient transporter, engineering machinery transporter has wide applications in carrying large equipments.

# The module for choice

**Radio remote control system**

**Improving security and efficiency**

**Self-weight measure system**

**Convenient for controlling production**

**GPS/GPRS system**

**Equipment managing & trouble diagnosing**
